I. Central Business District (CBD) Tree Plan (Presented by Public Works Director Hansen) (Discussion Only)

1. Public Works Director Hansen will lead a discussion regarding the future of the Central Business District Trees and Streetscape Project.

Public Works Director Hansen and Professional Engineer Topor led a discussion regarding the future of the CBD Trees and Streetscape Project. Public Works Director Hansen showed an overview map of the trees in the CBD and stated there are currently 111 trees in the CBD that are listed on this map. Professional Engineer Topor stated the blue dots on the map represent where there are no trees now, but could be good places for trees to be added. Public Works Director Hansen reviewed the reasons to consider removing the existing trees and the reasons for new trees. Public Works Director Hansen stated there are 2 Options: the first option is to do Selective Removal and Replacement, and the second option is to do a Removal and Replacement of All Trees in the CBD. Public Works Director Hansen stated there are pros and cons to both options. Professional Engineer Topor showed a picture of Silva Cells and reviewed how these can be strategically used in the CBD. Trustee Thompson asked if Silva Cells can be used in the future if the trees are delayed. Public Works Director Hansen stated they would have to remove the area between the curb and a business to excavate, but he would prefer being more efficient and getting everything done at once.

Trustee Fasules stated he suggests Silva Cells all along Main Street. Trustee Enright stated he feels the Silva Cells should be used more strategically. Public Works Director Hansen stated they would use Silva Cells is areas where it is tight and there is not a lot of room. Public Works Director Hansen stated the Capital Improvements Commission has a wait and see attitude on this as they would like to look at the options once the project is designed and also save as many trees as possible.

There was a discussion regarding the 2 Options. Trustee Fasules stated they would be doing this for the future, and he is inclined to choose Option 2 and do as many Silva Cells as they can. Trustee Christiansen stated she is leaning toward Option 2, and she would like to possibly see more than the proposed 20 trees transplanted. Trustee Pryde stated he is in favor of Option 2, and he would like to see more Silva Cells as well.
Trustee Senak asked about the cost difference between Options 1 and 2. Public Works Director Hansen stated he thinks this will be a wash because there might be a $50,000 cost difference up front, but they then cannot anticipate the cost and labor of the trees that can be saved and transplanted. Trustee Senak stated he is in favor of Option 2, but he would like to see the budget for Option 1 as well. Trustee Senak stated he would like to see more Silva Cells.

Trustee Enright stated he is concerned about the public perception of removing the trees and would like to ensure this is communicated widely. Trustee Enright stated he prefers Option 1.

Trustee Thompson stated he supports Option 2 and would like to add more Silva Cells wherever possible.

President McGinley stated the majority of the Village Board supports Option 2 and would like to see more research done. Public Works Director Hansen stated they will put an education plan together for the residents.
